A B O U T M E

An UI developer with 2.4 years of experience in developing applications(web and desktop) using modern JavaScript library such as ReactJs. I am willing to work for a company where I can help the company grow with my knowledge base , along with personal growth ,through continuous process of learning and improvising throughout the course of my career.

E X P E R I E N C E

Jan 2021-Present

Senior Systems Engineer at Infosys Limited
- Worked as React Developer for a flight based company called Sabre
- Designed reusable user interface components in using ReactJs
- Developed scalable cross-platform desktop application using electron-react-boilerplate
- Managed application state using react-redux and redux-toolkit
- Used client UI library called spark for development for ReactJs components
- Translated mockup designs into high quality code using ReactJs
- Implemented PowerShell triggering for fetching data from backend
- Implemented electron-json-storage for handling reading and storing the JSON file for frontend rendering
- Wrote jest test cases for all the components, actions and reducers
- Extensively used Git commands for pushing the code into bitbucket
- Participated in continuous enhancement, demo sessions and requirement discussions with client
- Got appreciated for working single handedly for two weeks and increasing the percentage completion of the project

Sep 2020-Dec 2020

Systems Engineer at Infosys Limited
- Worked as React Developer for flight based company called Sabre
- Developed highly scalable cross platform desktop application using electron-react-boilerplate
- Developed responsive reusable components using reactJs
- Used redux for managing application state, and then transformed the application code to use react-redux and redux-toolkit
- Implemented aliased action creators for implementing reading JSON files using electron-json-storage for front end rendering
- Extensively used Git commands for pushing the code into bitbucket
- Participated in business requirement discussions and demo sessions to develop mockup screens

July 2020-Aug 2020

Systems Engineer at Infosys Limited
- Provided enhancements and bug fixes to already developed web application
- Modified HTML and CSS code for responsiveness
- Participated in design enhancement sessions
- Got appreciated for completing the given tasks on time

Aug 2019-
May 2020

Systems Engineer at Infosys Limited
- Worked as a full-stack developer(MERN) for a US based Banking client
- Developed highly responsive and reusable reactJS components for the web application
- Managed the state of the application using redux
- Used Ant Design UI library for the development of user interface
- Provided bug and issue fixes for already developed UI
- Fetched data from backend using Restful API's to display the UI
- Developed new API services using NodeJS and Express, to fetch and manipulate data from database and UI
- Provided bug fixes for already existing services
- Created SQL queries for fetching data from the database
- Extensively used git for pushing the code
- Used JIRA as bug tracking tool to maintains the bugs on a regular basis
- Participated in business and system requirement discussions

Dec 2018-
Apr 2019

Systems Engineer Trainee at Infosys Limited
- Completed Generic Training at Infosys Mysore campus for Various technologies like Pythons, DBMS, OOPS
- Completed Stream training with POC in MERN stack development. Created wanderlust , a travel booking web application using MERN.

SKILLS

- **Programming Languages:** JavaScript, NodeJs , Express
- **UI Frameworks**: ReactJS , HTML5, CSS3, Redux, Redux Toolkit, React Hooks
- **Package Managers**: npm
- **Database**: MongoDB, MS SQL
- **IDE**: Visual Studio Code
- **SDLC**: Agile
- **UI Library**: Ant Design, Bootstrap
- **Other tools**: Github, Bitbucket

EDUCATION

2013-2014   •12th Kairali School   -75%

2014-2018   • B.E in ISE from MVJCE   -72%
